Dear Careers Advisor,

This pack is designed to promote a career in Environmental Health and engage sixth form students in the type of life our Environmental Health Officers enjoy in the East.

In our changing world there are now new and exciting tasks which are included in the role and this pack is intended to demonstrate these tasks and what is required academically to achieve the qualifications to become a qualified Environmental Health professional in our demanding society.

We hope you will make use of the posters and leaflets in your careers department and click on to the website – [www.makethedifference.eu](http://www.makethedifference.eu)

Thank you for your time.
